

Assessment Cover Sheet

Assessment Title	Workshop Reflection		
Assessment Type	Uncontrolled	Individual	Not must-pass
Due Date	14 April 2025	Course Code	EN8911
Course Title	Engineering Research Project		
Internal Moderator's Name	Prof. Dimitrios Mathioulakis		
External Examiner's Name	Dr. Arun Arjunan		

Instructions:

1. This cover sheet must be completed (section in red below) and attached to your assessment before submission in hard copy/soft copy.
2. The time allowed for this assessment is till 14 April 2025, Time 23:59.
3. This assessment carries 5 % marks and assessing CILO 1, 2, and 5.
4. The **use of generative AI tools is strictly prohibited**.
5. References consulted (if any) must be properly acknowledged and cited.
6. The assessment has a total of 3 pages

Learner ID	202101289	Date Submitted	20/04/2025
Learner Name	Abdulla Salman		
Programme Code	EN8020		
Programme Title	Bachelor of Engineering Technology (Mechanical)		
Lecturer's Name	Dr.Belal Elsayed		

By submitting this assessment for marking, I affirm that this assessment is my own work.

Learner Signature

Abdulla Salman

Do not write beyond this line. For assessor use only.

Assessor's Name			
Marking Date		Maks Obtained

1. Main points and scope of the workshop

Workshop 1: Professionalisms, Ethics and Transparency

Main Points

Definition of Professionalism & Work Ethics

- Professionalism encompasses the behavior, attitude, and conduct expected in a workplace. Work ethics involve hard work, determination, a positive mindset, and consistency in performing tasks.

Importance of Mindset and Behavior

- Success is often attributed to 80% psychology and 20% skills. A strong mindset, positive attitude, and a commitment to continuous self-improvement are essential for achieving professional success.

Building Trust & Communication

- Consistency, responsibility, and openness are key to establishing credibility in the workplace. Effective communication is fundamental to professional conduct.

Learning & Development

- There is a strong emphasis on ongoing learning and self-development. Adapting to change is crucial; otherwise, one risks becoming obsolete—much like "Blackberry in a world of iPhones."

Professional Qualities Employers Seek

- Employers value skills such as teamwork, problem-solving, emotional intelligence, and self-management, particularly in recent graduates entering the job market.

Real-World Examples

- Quotes from leaders like Tony Robbins and Jassim Al Ameen highlight the real-world importance of passion, consistency, and mindset.

Scope

- This content is targeted at recent graduates or early-career professionals, aiming to equip them with essential professional skills and a success-oriented mindset. It encourages proactive behavior and lifelong learning for sustained career growth.

Workshop 2: How to Write a Good Research Paper

Main Points

Detailed Breakdown of Research Paper Structure

- The workshop provides a comprehensive overview of each essential component of a research paper, including the title, abstract, introduction (with sub-elements like background, problem statement, literature review, research gap, and motivation), methodology, results, discussion, conclusions, and references.

Guidance on Articulating Research Elements

- Participants receive specific advice on clearly and effectively communicating key aspects of their research, such as defining research objectives, describing the methods used, presenting key findings, and formulating insightful conclusions.

Emphasis on the Writing Process

- The workshop highlights the importance of drafting, revising, and finalizing academic writing as iterative steps essential for achieving clarity, coherence, and overall quality in the research paper.

Scope

In a groundbreaking workshop designed for aspiring researchers, participants are guided through the essential components of crafting a research paper, from structuring the introduction to articulating findings effectively. Emphasizing the iterative nature of writing, the workshop offers practical tips for drafting and revising, ensuring clarity and coherence. Attendees also explore common challenges in academic writing and learn actionable strategies to overcome them, ultimately enhancing their ability to communicate research findings to their target audience with confidence and precision.

2.The most important things that you have learned

Workshop 1: Professionalisms, Ethics and Transparency

Definition of Professionalism: Professionalism pertains to an individual's conduct, behavior, and attitude in a work or business setting. It encompasses the skills, good judgment, and courteous behavior expected from trained professionals.

Importance of Work Ethic: Work ethics are defined by a blend of hard work, determination, and a positive mindset, all aimed at achieving tasks and objectives effectively.

Qualities of a Professional: Key qualities of a professional include planning, preparation, adaptability, and maintaining the right mindset and attitude.

Mindset and Success: Success is greatly influenced by psychology (mindset) alongside the mechanics or skills necessary to achieve goals.

Employer Expectations: Employers prioritize responsibility, ethics, teamwork, and strong communication, interpersonal, and problem-solving skills, all integral to professionalism.

Continuous Learning: The necessity for continuous learning and development is vital for remaining relevant in an ever-changing world.

Action Over Intention: Ideas, intentions, and plans gain value only when they are translated into action.

Workshop 2: How to Write a Good Research Paper

1. Structured Approach to Writing: Recognizing the significance of a well-organized structure for a research paper, especially in the introduction, helps clarify the research context and its importance.

2. Iterative Writing Process: Understanding the value of beginning with a first draft and refining it through multiple revisions highlights that writing is an ongoing process rather than a one-off task.

3. Role of Visuals and Formatting: Incorporating high-quality visuals and proper formatting is essential for improving the paper's readability and making a positive impression on reviewers and readers.

4. Research Gap Identification: Effectively identifying and articulating the research gap is vital for demonstrating how the work contributes to the existing body of knowledge.

5. Importance of Citations: Adhering to proper citation practices is crucial for avoiding plagiarism and recognizing the contributions of other researchers, thereby upholding the academic integrity of the paper.

3. New aspects or techniques that have been presented

Workshop 1: Professionalisms, Ethics and Transparency

1. Mindset Shift: The 80/20 Rule for Success

New Insight

- Success is driven 80% by psychology—mindset, attitude, and behavior—and only 20% by technical skills, reflecting Tony Robbins' principle.

Technique

- Embrace discomfort to foster growth, get comfortable with being uncomfortable. Focus on cultivating a proactive, problem-solving mindset instead of relying solely on qualifications.

2. Trust-Building as a Professional Skill

New Insight

- Trust is essential in professional relationships but requires intentional effort.

Technique

- Be consistent in actions and communication (meet deadlines and maintain transparency).
- Practice active listening and accountability to enhance reliability.

3. Work Ethic: Action Over Intent

New Insight

- Employers emphasize demonstrated work ethic (97.5% according to a NACE study)—valuing attitude, teamwork, and problem-solving over mere hard work.

Technique

- Combine passion with execution (as illustrated by Jasmi's CEO: "Ideas are worthless without action").
- Utilize planning and agility to navigate challenges (inspired by Toyota's leadership model).

4. Continuous Learning as a Non-Negotiable

New Insight

- The "Blackberry vs. iPhone" analogy (by Tim Grover) highlights the need for adaptability to avoid obsolescence.

Technique

- Study industry leaders and pursue cross-training in various fields ("Be open to that").
- Develop skills that will be in demand by 2025, such as emotional intelligence and creative problem-solving.

Workshop 2: How to Write a Good Research Paper

1. Structured Introduction Framework

New Insight:

- A well-organized introduction enhances clarity and engages readers by outlining the research context and significance.

Technique:

- Provide a background story to set the stage.
- Identify a significant problem and conduct a literature review.
- Clearly define the research gap to highlight the contribution.

2. First Draft and Iterative Improvement

New Insight

- Emphasizing the importance of completing a first draft can reduce the intimidation of starting to write.

Technique

- Begin writing without focusing on perfection.
- Use multiple revisions to refine content and improve grammar.

3. Effective Use of Visuals and Formatting

New Insight

- High-quality visuals and proper formatting significantly impact the readability and attractiveness of a research paper.

Technique

- Ensure all figures and tables are clear and relevant.
- Maintain consistent formatting to enhance overall presentation.

4. How you can apply the workshop's aspects and techniques to your project

Workshop 1: Professionalisms, Ethics and Transparency

1. Implement a Structured Approach to Professionalism: I will incorporate the essential principles of professionalism—such as reliability, effective communication, and ethical behavior—into every stage of my project. This includes establishing clear expectations, adhering to deadlines, and ensuring transparency with stakeholders.

2. Adopt a Growth Mindset for Continuous Learning: I will embrace the workshop's focus on lifelong learning by actively seeking feedback, staying informed about industry trends, and honing my skills (such as analytical thinking and leadership) to improve project outcomes.

3. Enhance Work Ethic through Planning and Adaptability: I will break down project tasks into manageable steps, monitor progress regularly, and remain flexible to changes, ensuring alignment with the workshop's emphasis on hard work, determination, and problem-solving.

4. Leverage Effective Communication Techniques: I will practice clear and concise communication, utilizing tools like structured reports and visual aids (as emphasized in the workshop) to effectively convey ideas and updates.

5. Focus on Consistency and Execution: I will prioritize action over intentions by setting measurable goals and maintaining momentum to ensure project success, reinforcing the workshop's principle that "ideas are worthless without execution."

Workshop 2: How to Write a Good Research Paper

1. Implement a Structured Writing Framework: I will organize my paper using the structured approach discussed in the workshop, ensuring that each section (introduction, methodology, results, etc.) follows a clear and logical sequence.

2. Embrace the Iterative Writing Process: I will concentrate on producing a first draft without striving for perfection, allowing me to quickly capture my ideas. Afterward, I'll revise and refine the content multiple times to improve clarity and coherence.

3. Enhance Visuals and Formatting: I will focus on creating high-quality figures and tables that effectively present my data. Additionally, I'll ensure that my formatting adheres to the journal's guidelines to enhance the overall presentation of my work.

4. Clearly Define the Research Gap: I will dedicate time to thoroughly identify and articulate the research gap in my project, highlighting how my work contributes to existing literature and addresses specific challenges.

5. Focus on Proper Citations: I will make use of citation management tools to organize and format my references accurately, ensuring that all sources are properly cited to uphold academic integrity.

5.What can be improved or added to this workshop

Workshop 1: Professionalisms, Ethics and Transparency

1. Interactive Elements

Improvement

- Introduce role-playing scenarios (addressing workplace conflicts, ethical dilemmas, or client interactions).
- Include real-world case studies (whistleblowing incidents, corporate transparency failures).

Benefit

- Encourages practical application of ethical principles.
- Help participants develop problem-solving skills in a safe environment.

2. Peer Feedback & Group Discussions

Improvement

- Implement structured peer feedback sessions focused on professionalism (mock interviews, email etiquette reviews).
- Organize small-group discussions on (What would you do?) ethical scenarios.

Benefit

- Builds teamwork and communication skills.
- Provides diverse perspectives on workplace ethics.

3. Industry-Specific Examples

Improvement

- Tailor discussions to various industries (e.g., healthcare ethics versus tech transparency).
- Invite guest speakers from different fields to share real-world challenges.

Benefit

- Makes content more relevant to participants' career paths.
- Enhances practical understanding of professionalism in diverse contexts.

4. Digital & Remote Work Professionalism

Improvement

- Add a section on virtual professionalism (Zoom etiquette, email tone, LinkedIn presence).
- Discuss AI and ethics (e.g., bias in hiring algorithms, data transparency).

Benefit:

- Prepares attendees for modern, hybrid work environments.
- Addresses emerging ethical challenges in tech-driven workplaces.

5. Self-Assessment & Action Plans

Improvement

- Include a self-assessment quiz (e.g., "How professional is your mindset?").
- Guide participants in creating a personal development plan for continuous improvement.

Benefit

- Encourages self-reflection and accountability.
- Help attendees set measurable goals for growth.

Workshop 2: How to Write a Good Research Paper

1. Interactive Writing Exercises

Improvement: Incorporate hands-on activities that allow participants to practice writing specific sections of a paper in real-time.

Benefit: This approach boosts engagement and provides immediate feedback on writing techniques.

2. Peer Review Sessions

Improvement: Include structured peer review sessions where participants can share drafts and receive constructive feedback.

Benefit: This fosters collaboration and enables attendees to learn from each other's perspectives.

3. Examples of Successful Papers

Improvement: Provide examples of well-written research papers from various fields, highlighting key elements discussed in the workshop.

Benefit: Analyzing successful papers offers participants concrete models to emulate in their writing.

4. Citation Management Tools Workshop

Improvement: Offer a mini session on using citation management tools like EndNote or Mendeley.

Benefit: Familiarizing participants with these tools can streamline the referencing process and reduce the risk of plagiarism.

5. Focus on Journal Selection and Submission Process

Improvement: Add a segment on selecting the right journal and understanding the submission process, including how to respond to reviewer comments.

Benefit: This knowledge can help participants navigate the publication process more effectively, improving their chances of acceptance.
