EN8914

Course Title

Final Year Project

Internal Moderator's Name**External Examiner's Name****Instructions:**

1. This cover sheet must be completed (section in red below) and attached to your assessment before submission in hard copy/soft copy.
2. The time allowed for this assessment is till **13th May 2026**.
3. This assessment carries 45 % marks and assessing CILO 1, 2, 3, 4, 5 and 6.
4. The integration of AI tools and resources is encouraged to enhance learning and understanding of core theories and principles. AI-generated content, such as videos and web resources, may be utilized for brainstorming sessions and comprehensive exploration of material science concepts, provided their use adheres to ethical guidelines and academic integrity standards.
5. References consulted (if any) must be properly acknowledged and cited.

EN8914 Final Year Project - Defense & Poster Presentation (45%)

1. Assessment Description

This integrated assessment is the culminating oral and visual defense of your final year project. It is designed to evaluate your ability to professionally communicate, justify, and advocate for your engineering solution under scrutiny. The assessment consists of two complementary components:

1. **Formal Oral Presentation & Defense (80 % of this assessment):** You will deliver a concise, formal presentation to an academic panel, summarizing your project's journey from problem identification to validated outcome. This will be followed by a rigorous question-and-answer session where you must defend your methodology, decisions, and results. A live demonstration or a detailed summary of key results is mandatory.
2. **Project Poster & Exhibition (20 % of this assessment):** You will design and present a professional poster that provides a visual summary of your project for a broader, mixed audience of peers, industry experts, and the public. You must be prepared to discuss your work informally and explain its value to both technical and non-technical stakeholders during the Engineering Project Expo.

This is a must-pass assessment. Failure to achieve a passing grade in this assessment will result in failure of the EN8914 course, regardless of performance in other components.

2. Presentation Structure & Content Guidelines

Your formal oral presentation should be approximately 15-20 minutes long, followed by a 15-20 minutes Q&A session. The mandatory slide structure is as follows:

1. **Title Slide:** Project Title, Your Name, Supervisor's Name, Course Code (EN8914), Bahrain Polytechnic Logo. (Follow the available template on Moodle).
2. **Introduction:** The broad context and specific motivation for the project.
3. **Literature Review:** Summary of existing work and the identified gap your project fills.
4. **Problem Statement:** A clear, concise statement of the specific engineering problem.
5. **Objectives:** The primary aim and the specific objectives.
6. **Scope of the Project:** The boundaries and key deliverables of your project.
7. **Methodology:** Your research design, methods, materials, and procedures. Justify your choices.
8. **Results:** Present your key findings objectively. Use figures, graphs, and include a live demonstration or detailed results summary.
9. **Discussion:** Interpret your results. Relate them back to your objectives and the literature.

10. **Business Model & Commercial Viability:** Present your proposed business model, market entry strategy, and sustainable competitive advantage.
 11. **Significance, Sustainability & Bahrain Perspective:** Explain the project's importance, its sustainable impact, and its specific relevance to Bahrain.
 12. **Conclusion:** Summarize the entire project and state your final conclusions.
 13. **Future Recommendations:** Suggest specific and actionable steps for future work.
 14. **References:** A slide listing key references.
-

3. Guidelines for Group Project Presentations

For group projects, the presentation is a collaborative defense of the integrated work. All members must participate substantially and demonstrate mastery of both the collective project and their individual contributions.

Presentation Structure and Participation

- **Single Presentation:** The group will deliver one cohesive presentation following the mandated slide structure and time limit (15-20 minutes).
- **Title Slide:** Must include the project title, the full names and student IDs of all group members, the supervisor's name, course code (EN8914), and the Bahrain Polytechnic logo.
- **Oral Delivery:** The speaking time must be divided equitably among all group members. Transitions between speakers should be smooth and logical, corresponding to changes in topic or section (e.g., one member presents the Methodology for their component, another presents their corresponding Results).
- **Integrated Demonstration:** Any live demonstration or detailed results summary must be a unified showcase of the group's solution, with each member prepared to explain and defend the part they developed.

Highlighting Individual Contributions

While presenting the integrated project, each member must clearly articulate their specific role and outcomes. This can be achieved through:

- **Objectives Slide:** The "5. Objectives" slide must explicitly outline both the Overall Group Objectives and the Specific Individual Objectives for each student. This clearly establishes the unique responsibilities and deliverables for which each member is accountable.

- **Attribution in Slides:** Key slides (e.g., in Methodology, Results) should include a brief, clear identifier (e.g., "Developed by: Student Name, ID") for major components, directly linking back to the stated individual objectives.
- **Verbal Articulation:** During their assigned sections, each speaker should explicitly connect their narration to their personal objectives and work packages (e.g., "My primary individual objective was to optimize the control algorithm. As shown in this simulation result, my approach achieved a 15% improvement in response time, directly addressing Objective 3b...").
- **Unified Q&A Defense:** During the question-and-answer session, any member may be called upon to answer. All members are expected to be conversant with the entire project, but individuals should take the lead in defending questions directly related to their specific objectives and contributions, demonstrating deep, personal accountability.

Project Poster & Exhibition

- **Single Poster:** The group will produce one professional poster summarizing the project.
- **Credit Line:** The poster must clearly list all group members' names and student IDs in a prominent credit line.
- **Group Defense:** During the Expo, all group members should be present. They are collectively responsible for explaining the project. Individuals should be prepared to elaborate in detail on the sections and results that stem from their individual objectives.
- **Video Poster Presentation Option:** As an alternative to the live Expo defense, any student who did not participate in the exhibition will submit a video poster presentation. This consists of a short video (3-5 minutes maximum) in which the student:
 - Clearly presents the project's poster on screen.
 - Provides a concise, professional narration explaining the poster's main points (problem, objectives, methodology, key results, and conclusion).
 - Demonstrates their personal understanding of the project.
 - This video will be submitted via Moodle by the Expo deadline and will be marked in lieu of the live presentation, constituting 20 % of the overall poster & exhibition assessment grade.

General Principle

The presentation is not merely a summary of the thesis; it is a demonstration of professional teamwork and individual competence. The panel will assess both the seamless integration of the group's work into a compelling narrative and the clear evidence of substantial, defensible individual contribution from each member, as rooted in their stated individual objectives.

EN8914 Defense & Poster Presentation - Marking Rubric (100 Marks)

Student Name and ID: _____

Supervisor/Examiner Name: _____

Total Mark: -----/100

COMPONENT & CRITERIA	POOR (0-59%)	GOOD (60-69%)	VERY GOOD (70-84%)	EXCELLENT (85-100%)	MARKS
A. ORAL PRESENTATION & DEFENSE (80 MARKS)					/80
CONTENT & STRUCTURE (CLARITY, LOGIC, COMPLETENESS)	Disorganized, illogical flow. Critical content is missing. Does not follow the required structure.	Structure is unclear. Jumps between topics. Several required slides are superficial or missing key details.	Logical flow and clear structure. Covers all required slides with sufficient depth for understanding.	Compelling, logical narrative that expertly follows the required structure. All slides are concise, impactful, and complete.	/10
TECHNICAL DEPTH & DEMONSTRATION (METHODOLOGY, RESULTS)	Superficial description of methods. Demo/results are missing, fail, or are irrelevant. Unable to explain the core work.	Demo/results are basic. Explanation of methodology and results is vague. Major gaps in technical description.	Clear demo/results that are relevant to objectives. Able to explain the methodology and key outcomes clearly and to what extent the objectives are met.	Persuasive demo/results that clearly validate the solution. Explains complex methodology and results with ease and insight and also to what extent the prototype/model is fulfilling project objectives.	/20
CRITICAL ANALYSIS & ARGUMENT (DISCUSSION, BUSINESS CASE, JUSTIFICATION)	No critical discussion. Business case is not addressed. Decisions are not justified.	Limited discussion and justification. Business case and sustainability are mentioned but lack depth or analysis.	Results are discussed and linked to objectives. Presents a coherent business case and justifies key decisions.	Expert critical discussion. Presents a compelling, viable business case and a nuanced sustainability analysis. Decisions are persuasively justified.	/15
SIGNIFICANCE & BAHRAIN PERSPECTIVE	The project's importance and relevance to Bahrain are not communicated.	Significance is weak. Bahrain perspective is generic, tenuous, or poorly explained.	Clearly explains the project's significance and provides a relevant Bahrain perspective.	Powerfully argues the project's significance. Bahrain perspective is specific, well-researched, and compellingly linked to national goals.	/10
DEFENSE & Q&A (HANDLING OF QUESTIONS, DEPTH OF KNOWLEDGE)	Unable to answer questions, evasive, or provides incorrect information. Lacks mastery of the project.	Struggles with complex questions, provides superficial or partially incorrect answers. Knowledge is patchy.	Answers most questions clearly and accurately. Demonstrates a good grasp of the project's details and limitations.	Answers all questions confidently, deeply, and with critical insight. Demonstrates comprehensive, masterful knowledge.	/20
DELIVERY & PROFESSIONALISM (CLARITY, PACE, BODY LANGUAGE, TIME MANAGEMENT)	Mumbles, reads from slides, poor eye contact. Significantly over or under time. Unprofessional demeanor.	Uneven pace, some reliance on notes. Limited eye contact or engagement. Noticeable timing issues.	Clear speech, good pace. Good eye contact and posture. Manages time effectively. Professional demeanor.	Engaging, confident, and articulate delivery. Excellent command of language and audience. Perfect timing. Highly professional.	/5

B. PROJECT POSTER & EXHIBITION (20 MARKS)					/20
VISUAL DESIGN & IMPACT (LAYOUT, GRAPHICS, READABILITY)	Cluttered, messy, poor use of space. Low-quality graphics. Difficult to read from a distance.	Layout is unbalanced. Graphics are basic. Text is too dense or too small, hindering readability.	Visually appealing and well-organized. Good use of graphics and white space. Generally clear and readable.	Professional, polished, and visually striking. Excellent balance of text and visuals. Highly engaging and easy to digest.	/5
CONTENT & CLARITY FOR MIXED AUDIENCE (SUMMARY, CONCISENESS)	Fails to summarize key points. Uses excessive jargon or is overly simplistic. Message is unclear.	Key information is buried or missing. Struggles to balance technical depth with accessibility.	Provides a clear summary of the problem, method, and outcome. Accessible to a mixed audience with some jargon explained.	Masterfully summarizes the project. Perfectly pitched for a mixed audience—engaging for non-experts yet substantive for experts.	/10
ENGAGEMENT & VERBAL EXPLANATION (AT THE POSTER SESSION)	Passive, unable to explain the project or its value. Fails to engage with viewers.	Provides a basic, rehearsed summary but struggles with follow-up questions. Limited engagement.	Proactively engages audience. Delivers a clear "elevator pitch" and can discuss the project effectively with visitors.	Highly engaging and adaptive communicator. Excellently articulates value to all audience types, sparking interest and discussion.	/5
FINAL TOTAL (A + B)					/100
